**New License**

A new license entitles the purchaser to:

- A license certificate that enables the correct functionality set for the license type.
- A 12 month 'subscription' that entitles the user to:
  - priority email support and
  - acquire free updates of the Labnaf software for the purchased license type.

**Yearly Renewal Fee: 33% of the list price.**

Once you have purchased Labnaf software, you can reinstate it, before your subscription lapses, just by paying the renewal fee for the license type you hold.

A renewal extends a purchaser's 'subscription' for an additional 12 months, thereby providing access to priority email support and free updates.

A renewal entitles the purchaser to receive the latest version of the Labnaf software.

The renewal will cover the number and type of licenses originally purchased.

Any additional licenses must be purchased at the standard list price for the required license type.

**Labnaf software license certificates will not expire. Only the subscription will do.**

If you choose not to renew, you can continue to use the Labnaf software that you purchased, you just won't be able to update it unless you renew.

Subscriptions that have lapsed for 3 or more years will not be eligible for subscription renewals

and the user will need to purchase new licenses if they wish to use the latest version of the Labnaf software.

**These prices do not include:**

- VAT
- Sparx Systems' EA licenses (Labnaf needs EA's modeling infrastructure components)

**(\*) [Free software and documentation on www.labnaf.one](http://www.labnaf.one)**

On-line educational material is accessible for free only for the single purpose of self-education.

Any commercial usage of this material is subject to specific license fees.

**(\*\*) As the name suggests, Floating Licenses 'float' from user to user as they start and stop the various software products.**

A license for the product is only required while a user has the software running.

Once the product is shut down the license is available for another user to make use of.

Labnaf floating license work hand in hand and are sold only with Sparx Systems' Enterprise Architect floating licenses.

**(\*\*\*) Quantity Discounts for Addin licenses**

From 6 to 25 users: -25% => € 660,- / user

From 26 to 50 users: -50% => € 440,- / user

51 and more: -60% => € 352,- / user

Discounts cannot be combined with each other.

**\*\*\*\* 20 Labnaf PowerShell users**

20 users of one shared model repository

or, if there is no shared model repository, 20 users of any resulting output material generated by the Labnaf PowerShell.

Word, PDF and HTML generation require Addin Team, Addin Corporate or Labnaf Server running on the application server.
